

VACCINATION UK

Measles is spreading

MMR vaccine is available for those who have not received both doses of the MMR as an infant

Children who aren't fully vaccinated are at serious risk of complications such as ear infections, pneumonia, and, in rare cases, brain inflammation.

Check your child's MMR vaccinations today

- The MMR vaccine protects against Measles, Mumps, and Rubella
- Two doses give the best protection
- If you're unsure whether your child is up to date, ask your GP or practice nurse

We are able to vaccinate for MMR at our catch-ups and while visiting the schools or at a community clinic.
